Goldsmiths Wired Radio, "The Saxodrone Show"

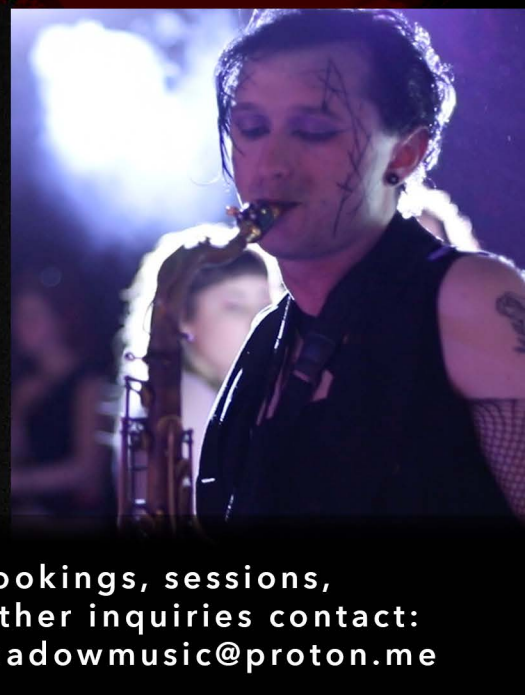

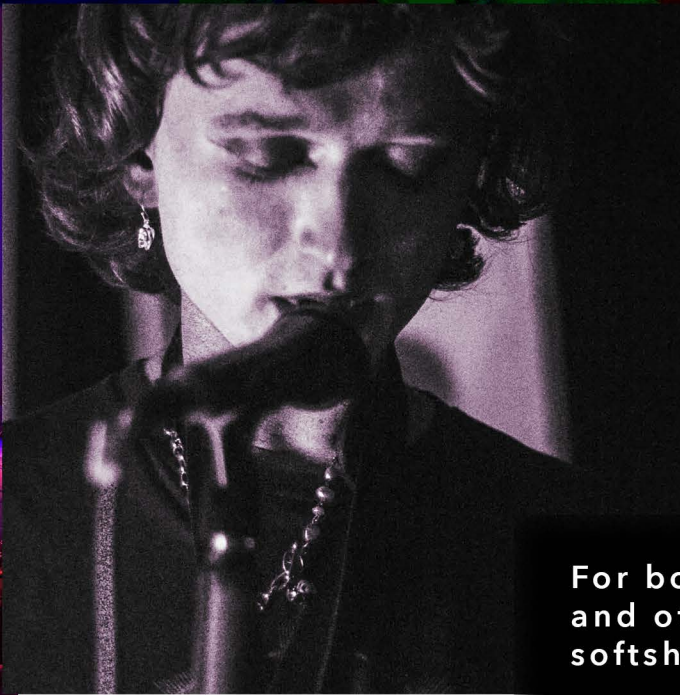

About/Bio

Softshadow is a sometimes-solo act of live-looping saxophone and spoken word, blending the likes of ambient soundscape, noisy free improvisation, and queer poetry. June is a trans dyke based in the London DIY scene since 2021, often performing with other poets, movement artists, visual programmers, and other improvising musicians to move, soothe, and stir soft emotions and sonic intensities. She has experience with event planning, and digital/traditional promotions. In 2025 she released 'a rose' on tape and digital through Rat Run Records, a DIY label. This year she is changing dynamics, planning a collaborative EP, a UK tour, and new kinds of performance technologies.
